

Thanks to Reynolon,[®] Oil and Vinegar Actually *Do* Mix.

If you have products you'd love to co-promote, mix them together with Reynolon[®] Shrink Film and it's sure to sweeten your sales. With Reynolon film, you can bundle any number of promotional combinations. Oil and vinegar. Peanut butter and jelly. Nachos and salsa. Champagne and caviar. Whether you are wrapping fresh food or shelf-stable items, Reynolon film allows you to mix and match products to your heart's content. From the commonplace to the exotic. Let your imagination run wild!

And, when you use Reynolon film, you can rest assured that your bundle will stick together, come what may. Reynolon film's legendary toughness will stand up to some pretty rough treatment, while allowing your product to shine through with brilliant clarity. To find out more, give us a call at **1-800-446-3456** or visit us on the web at www.alcoapack.com. If you're looking for new marketing ideas, we can offer you quite a bundle.

For Food and Beverage Packaging...

2023 A semi-rigid, low shrink film, which is excellent for wrapping food products such as candy canes, muffins and taco shells. Its excellent machinability lends itself to many non-food applications, as well. It complies with FDA regulations for food contact. Available flat and centerfolded.

2044 For applications requiring a biaxial film that complies with FDA regulations for food packaging. 2044 is specifically designed for high-speed automatic wrapping equipment requiring a fairly rigid formulation with high slip. Available flat or centerfolded.

5533 For applications requiring a biaxial film that complies with FDA regulations for food packaging. Provides a softer shrink than 5544 and is ideal on low profile and delicate products. Available flat or centerfolded.

5544 For applications requiring a softer biaxial film that complies with FDA regulations for food packaging. 5544 is a strong multipurpose shrink film with good machinability for high-speed packaging. Available flat or centerfolded.

9821 A very soft stretch film for hand wrap or automated stretch wrapper use.

REYNOLON FILM MINI TECH TIP:

When wrapping items with shiny surfaces such as picture frames, glossy metal cans and aerosol cans, remember these items are very cold relative to the film temp. You may see crow's feet, fish eyes and other detrimental marks. To eliminate, try enlarging your bag so the film can balloon away from the surface. Reduce the amount of perforations to let the film shrink gradually and have your Alcoa rep. help you select a Reynolon film with more controlled shrink. For more operating tips, contact your Reynolon film sales representative.

Reynolon Shrink Films look great on irregular packages, such as Elmer's candy hearts.

REYNOLON FILM FDA APPROVAL TIP:

Unless the film will be directly touching the food, you probably don't need an FDA approved film. Reynolon all-purpose films such as 4244, 5044 & 5061 provide a flexible solution whether you are wrapping promotions, multi-packs, cases or other packaged food or beverage products. For more information on these and other films, please contact your Reynolon film sales representative.

REYNOLON FILM MINI SALES TIP:

Searching for creative Food & Beverage opportunities? The world's finest come together in trade shows dedicated to the Food & Beverage industry. Some of the largest include Interbev (annually), WorldWide Food Expo (every two years), and others.

Reynolon Shrink Films keep gift baskets secure while showing off what's inside. Whether shrinking or gathering with a bow, Reynolon has all the options!
