

Stars by Van Gogh. Twinkle by Reynolon.[®]

While the rest of the world sees the brilliance of Van Gogh's creativity, the renowned print publisher Artbeats enjoys an entirely different picture: the clarity, sparkle and gloss of Reynolon[®] Shrink Film.

With Reynolon film, the choice is clear. It's versatile enough to conform to any shape, protecting everything from thin and delicate stickers, to long rolls of paper, to breathtaking works of art. And Reynolon film secures a package without crushing it, so there's no need for costly and unattractive chipboard reinforcement. With Reynolon film, the customer experiences the starry, starry night exactly as Van Gogh intended it.

Doesn't your product deserve the same precious care? To find out more, give us a call at **1-800-446-3456** or visit us on the web at **www.alcoapack.com**. For sparkling impact at the point of sale, Reynolon Shrink Film is a priceless work of art.

For Printing and Publishing Packaging...

2023 is a semi-rigid low shrink film, ideal for wrapping products such as stickers, brochures, and other low-profile items. Its excellent machinability lends itself to many high speed food applications as well. Available flat or centerfolded.

3011 is a very low shrink, biaxially orientated film with low shrink force. This film can be used for the most delicate packages, such as calendars or thin notepads, which may curl or bend with higher shrink force films. It has excellent machinability and provides good, tight seals. Available flat and centerfolded.

5033/5044 A biaxially oriented film with outstanding sparkle and gloss for all non-food products. It has high internal tear resistance and good memory. It offers wrinkle-free shrinkage on medium profile and textile packages with good storage characteristics and impact and abrasion resistance. Available flat or centerfolded.

5061 It is ideally suited for aseptic packaging, bundling, and other preferential applications such as rolls of gift wrap or kraft paper.

REYNOLON FILM MINI TECH TIP:

Are your customers wrapping calendars, stickers, notepads, or items with chipboard inserted just so the shrink film will not curl it? Save them money by switching to Reynolon 3011 or our other low shrink & low shrink force films. Remember, every item added to the package adds cost.

Whether the colors are bright and bold or soft and subtle, Artbeats, Inc. prints truly stand out in Reynolon Shrink Films.

REYNOLON FILM SALES TIP:

Look for printer/publisher opportunities that use chipboard backer. The value of Reynolon film goes beyond the elimination of chipboard cost. You can remove the chipboard, reduce the corrugated (if used), decrease the job turnaround time, lower shipment costs and eliminate some of the labor involved. Ask your Reynolon film sales representative for more information.

From mailers to envelopes to kraft paper, Gould Packaging relies on Alcoa Reynolon Shrink Films.
